

Security API Calls

Generally, this section applies to both **Armor Complete** and **Armor Anywhere** users; however, review the table below to make sure the specific API call is compatible with your product.

API call	Description	Product compatibility	Interactive Armor API section
Get Packages Status	The Get Packages Status API retrieves data for the operating system patching status of your virtual machines.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Packages	The Get Packages API retrieves data for the operating system patching status for a specific virtual machine.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Entries	The Get Log Entries API retrieves a list of entries for a virtual machine.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Event Types	The Get Log Event Types API retrieves a operating system log types.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Management List	The Get Log Management List API retrieves operating system logging details by host.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get OS Log Graph	The Get OS Log Graph retrieves operating system logging data points for a graph.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get OS Log Details	The Get OS Log Details API retrieves OS logging details for a host.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Upgrade Log Retention Plan	The Upgrade Log Retention Plan API upgrades your operating system log retention plan for a host.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Management Products	The Get Log Management Products API retrieves a list of products for log management.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Post Log Depot (Activate)	The Post Log Depot (Activate) API activates the Log Depot add-on product for your account.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Post Log Depot (Deactivate)	The Post Log Depot (Deactivate) API deactivates the Log Depot add-on product for your account.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Anti-Malware Host List	The Get Anti-Malware Host List API retrieves a list of Anti-Malware status details by host.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Anti-Malware Account Statistics	The Get Anti-Malware Account Statistics API retrieves a shortened, combined list of Anti-Malware (Malware Protection) status for your virtual machine.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Overview Security Status	The Get Overview Security Status API retrieves the various statuses of your virtual machines's subcomponents (Anti-Malware, FIM, and OS Patching).	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security

Get File Integrity Status	The Get File Integrity Status API retrieves an expanded list of FIM statuses for all hosts.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get File Integrity Account Statistics	The Get File Integrity Account Statistics API retrieves a shortened, combined list of FIM statuses for all hosts.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Overall Security Status	The Get Overall Security Status API retrieves the various statuses of your virtual machines. These statuses are based on the individual status of your virtual machine's subcomponents.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Anti-Malware Scan	The Get Anti-Malware Scan API retrieves data from an Anti-Malware scan for a specific host.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Search Log Events	The Search Log Events API retrieves a list of security log events.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Vulnerability Scans	The Get Vulnerability Scan API retrieves high-level information regarding the latest vulnerability scanning.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Report	The Get Vulnerability Scan API retrieves data for a specified report in a specified format.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Details for a Report	The Get Vulnerability Scan API retrieves data for a specified report.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Details for a Vulnerability	The Get Vulnerability Scan Details for a Vulnerability API retrieves detailed data for a specified vulnerability.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Report ID	The Get Vulnerability Scan Report API retrieves the scanReportId .	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Date	The Get Vulnerability Scan Date API retrieves the scan date for a specified report.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Statistics	The Get Vulnerability Scan Statistics API retrieves high-level statistics for the latest vulnerability scans.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Statistics for a Report	The Get Vulnerability Scan Statistics for a Report API retrieves statistics for a specified report.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scan Scoring Details	The Get Vulnerability Scan Scoring Details API retrieves the severity scores associated with a specified report.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Vulnerability Scans Data for Affected Virtual Machines	The Get Vulnerability Scans Data for Affected Virtual Machines API retrieves the virtual machine name and coreInstanceId for a specified report.	<ul style="list-style-type: none"> • Armor Anywhere 	Security
Get Security Analytics Overview	The Get Security Analytics Overview API retrieves your account's health scores.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Analytics
Get Security Incidents	The Get Security Incidents API displays a list of security incidents, including open and closed incidents.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Incidents

Get Security Incidents Severity Count	The Get Security Incidents Severity Count API displays the total number of security incidents, organized by severity level.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Incidents
Get Log Retention Types	The Get Log Retention Types API retrieves a list of log retention plans.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Sources	The Get Log Sources API retrieves a list of connected log sources for your account.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Storage	The Get Log Storage API returns log usage for the previous week.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Get Log Storage Totals	The Get Log Storage Totals API returns logs usage for the previous six months.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security
Create an IPRM rule (Dynamic Threat Blocking)	The Create an IPRM rule API call creates an IP rule, which will whitelist or blacklist an IP address.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Services
Delete an IPRM rule (Dynamic Threat Blocking)	The Delete an IPRM rule API deletes a specified IP rule.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Services
Get IPRM events (Dynamic Threat Blocking)	The Get IPRM events API call retrieves a list of IP lookups that have taken place in your account.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Services
Perform an IP lookup (Dynamic Threat Blocking)	The Perform an IP lookup API indicates if the specified IP address is part of an IP rule.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Services
Get IPRM overview (Dynamic Threat Blocking)	The Get IPRM overview API call retrieves the number of IP lookups (and corresponding date) that have taken place in the previous 30 days.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Services
Get IPRM Users (Dynamic Threat Blocking)	The Get IPRM Users API call retrieves the top users who have performed an IP lookup.	<ul style="list-style-type: none"> • Armor Complete • Armor Anywhere 	Security Services
