

Get Log Sources

Overview

This API call applies to both **Armor Complete** and **Armor Anywhere** users.

The **Get Log Sources** API retrieves a list of connected log sources for your account.

Sample request

```
GET https://api.armor.com/log-management/logsources
```

Input

The following table describes the different parts of this API call:

API Call / URL	Method / Type
/log-management/logsources	GET

There are no parameters for this API call.

Sample return

Status	Response
200	<pre>[{ "providerName": "CloudTrail", "title": "Cloud Trail", "description": "AWS CloudTrail is a service that enables governance, compliance, operational auditing, and risk auditing of your AWS account. With Armor's CloudTrail integration, you can log, continuously monitor, and retain account activity related to actions across your AWS infrastructure.", "imageName":</pre>
