

# Vulnerability Scanning

Home > Armor Complete - Product User Guide > Vulnerability Scanning

This topic only applies to **Armor Complete** users.

To fully use this screen, you must add the following permissions to your account:

- Read Compliance
- Write Compliance

---

## Overview

Use the **Vulnerability Scanning** add-on product to meet compliance requirements and review potential issues discovered by the scans.

You can order the following add-on products:

- Navis HIPAA Vulnerability Scans
- Navis PCI Vulnerability Scans
- Navis PCI + HIPAA Vulnerability Scans

After you order the **Vulnerability Scanning** add-on product, you can use the **Vulnerability Scanning** screen in the Armor Management Portal (AMP) to:

- View the status of the vulnerability scan
- Upgrade or downgrade your service
- Access the Navis portal to schedule a scan

---

## Order Vulnerability Scanning

1. In the Armor Management Portal (AMP), in the left-side navigation, click **Marketplace**.
2. Locate and select **Coalfire Vulnerability Scanning**.
3. Locate the desired add-on product, and then select **Choose This**.
4. Click **Purchase**.
5. A ticket will be automatically created and sent to Armor Support. To see the status of this ticket, in the left-side navigation, click **Support**, and then click **Tickets**. Armor will use this ticket to communicate with you about the status of your order and to inquire about your specific configuration requests.
  - When the product has been fully provisioned, you can view the **Vulnerability Scanning** screen in AMP for detailed information.

---

## Upgrade, downgrade, or delete a vulnerability scanning option

When you downgrade or delete a vulnerability scanning option, the changes will take place at the end of the billing cycle.

When you upgrade, the changes will take place immediately. Your next bill will be pro-rated to reflect this upgrade.

1. In the Armor Management Portal (AMP), in the left-side navigation, click **Security**.
  2. Click **Vulnerability Scanning**.
  3. Click the gear icon, and then select the desired option:
    - To upgrade or downgrade, select the **Change Service** icon, click **Choose This**, and then click **Purchase**.
    - To delete, select the **Remove Service** icon, and then click **Remove Vulnerability Scanning**.
-

# Access Coalfire's Navis portal and schedule a scan

You must use Coalfire's Navis portal to schedule a scan.

1. After you purchase an add-on product, you will receive an email with login information for Coalfire. Open the email, and then copy the login information. You will need this information to enter the Navis Portal.
  2. In the Armor Management Portal (AMP), in the left-side navigation, click **Security**.
  3. Click **Vulnerability Scanning**.
  4. Click **Loginto Navis Portal**.
  5. Use the login information from the email to access the Navis Portal.
  6. Under **Services**, click **Vulnerability Scans**.
  7. Click **Schedules**, and then click **Create New Scan Schedule**.
  8. In **Name**, enter a descriptive name, and then complete the empty fields.
  9. Click **Select Existing Target**.
  10. Mark the desired IP addresses, and then click **Add**.
  11. Click **Save Schedule**.
