

# Infrastructure API Calls

This topic only applies to **Armor Complete** users.

API call	Description	Product compatibility
Get Workloads	The <b>Get Workloads</b> API retrieve any workloads that are associated to your account.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Get Workload	The <b>Get Workload</b> API retrieves details for a workload that is associated to your account.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Update Workload	The <b>Update Workload</b> API updates the details for a workload associated to your account.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Delete Workload	The <b>Delete Workload</b> API deletes a workload in your account.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Create Tier	The <b>Create Tier</b> API creates a new tier on an existing workload.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Get Tier	The <b>Get Tier</b> API retrieves information for a specified tier from a workload.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Get Tiers	The <b>Get Tiers</b> API retrieves all the tiers associated with a specified workload.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Delete Tier	The <b>Delete Tier</b> API deletes a single tier from a workload.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Update Tier	The <b>Update Tier</b> API updates the name of a tier in a workload.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Get Locations	The <b>Get Locations</b> API displays available locations to provision new servers.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Get VMs	The <b>Get VMs</b> API displays a list of virtual machines in your account.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Get VM Detail	The <b>Get VM Detail</b> API displays details for a specific virtual machine.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Delete VM	The <b>Delete VM</b> API deletes a virtual machine.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Update VM Name	The <b>Update VM Name</b> API updates the name of a virtual machine.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Adjust VM Resources	The <b>Adjust VM Resources</b> API call updates a virtual machine to a new, fixed instance in order to increase/decrease CPU and/or memory.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>
Perform VM Power Actions	The <b>Perform VM Power Actions</b> API call performs a power action on a virtual machine.	<ul style="list-style-type: none"><li>• Armor Complete</li></ul>

Get VM Resource Stats	The <b>Get VM Resource Stats</b> API retrieves statistics for your virtual machine.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Get Orders	The <b>Get Orders</b> API retrieves the list of orders that are associated with your account.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Get Order	The <b>Get Order</b> API retrieves a specific order for your account.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Create New Virtual Machine	The <b>Create New Virtual Machine</b> API creates a new virtual machine (VM) order.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Create New Subscriptions	The <b>Create New Subscriptions</b> API submits a subscription order.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Get Storage Summary	The <b>Get Storage Summary</b> API returns a list of virtual machines, the related storage summaries for each storage tier (SSD, FLUID, RAW), and the location the storage is utilized.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Get Available Storage	The <b>Get Available Storage</b> API returns a list of available storage products that be added to a virtual machine.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Add Storage Disk to VM	The <b>Add Storage Disk to VM</b> API adds a disk to a virtual machine through the ID.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Delete Storage Disk	The <b>Delete Storage Disk</b> API deletes the specified disk via ID for the specified virtual machine.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Get Tasks	The <b>Get Tasks</b> API retrieves a list of scheduled events that are associated with your account.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Delete Tasks	The <b>Delete Tasks</b> API deletes a scheduled event that is associated with an entity.	<ul style="list-style-type: none"> <li>• Armor Complete</li> </ul>
Get Report Utilization	The <b>Get Report Utilization</b> API downloads a file with the usage information for your virtual machines.	<ul style="list-style-type: none"> <li>• Armor Anywhere</li> </ul>
