

Detection Dashboard (Armor Complete)

Home > Armor Anywhere - Product User Guide > Health Overview Dashboard (Armor Complete) > Detection Dashboard (Armor Complete)

Overview

In the **Detection** screen, the **Detection** score focuses on the incoming activity of Armor services. You can use these scores to determine if Armor is receiving the necessary data to perform useful security checks for your environment.

For **Armor Complete**, these services are:

- Malware Protection
- FIM
- Filebeat (for Linux)
- Winlogbeat (for Windows)

For **Armor Anywhere**, these services are:

- Malware Protection
- FIM
- IDS
- Filebeat (for Linux)
- Winlogbeat (for Windows)
- Vulnerability Scanning

Widgets and graph

Widget	Description								
Detection Score	<p>This widget calculates a score based on:</p> <ul style="list-style-type: none">• Armor services that are collecting logs• Agents that are powered on <table border="1"><thead><tr><th>Score range</th><th>Health status</th></tr></thead><tbody><tr><td>10 - 8</td><td>Good</td></tr><tr><td>7 - 4</td><td>Fair</td></tr><tr><td>3 - 1</td><td>Poor</td></tr></tbody></table>	Score range	Health status	10 - 8	Good	7 - 4	Fair	3 - 1	Poor
Score range	Health status								
10 - 8	Good								
7 - 4	Fair								
3 - 1	Poor								
Events Analyzed	<p>An event is any log that passes an Armor agent.</p> <div style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;">Malware Protection, File Integrity Monitoring, Log and Event Management, and Patching contain a subagent.</div> <p>This widget displays data from the previous month.</p>								
Services Reporting	<p>This widget displays the percentage of agents that are receiving events. You can use this number to determine overall if your subagents are running properly.</p>								
Detection Score Trend	<p>This graph displays the history of your detection scores.</p>								

Detection Events table

The **Detection Events** table displays information for the past seven days. This table will update every day.

Column	Description
Date	This column displays the date that Armor received the log.
Total Events	This column displays the number of logs received for that day.
Category	This column displays the type of log received from the Total Events column. This column lists the subagent for the collected logs.
