

Delete Tasks

Overview

The **Delete Tasks** API deletes a scheduled event that is associated with an entity.

You can use the [Get VMs](#) or [Get VM Detail](#) APIs to find the entity ID (**entityId**).

Sample request

```
DELETE https://api.armor.com/vms/100/tasks
{
  "action": "delete"
}
```

Input

The following table describes the different parts of this API call:

API Call / URL	Method / Type
/{entityType}/{entityId}/tasks	DELETE

The following table describes the parameter (or parameters) for this API call:

Parameter	Description	Required or optional	Type	Example
entityType	The type of the entity (You must enter vms .)	Required	String	vms
entityId	The ID of the entity	Required	Integer	100

Sample return

Status	Response
200	Deleted task 12345 for EntityType: vms and EntityId: 100
400	Could not delete task 12345 for EntityType: vms and EntityId: 100type: vms and EntityId: 100
