

Excerpts / Snippets Landing page

Overview

This space will only contain excerpts / snippets that are used to populate the Knowledge Base space.

List of snippets

- Snippets (internal usage)
 - General snippets
 - Armor Anywhere users (snippet)
 - Armor Complete users (snippet)
 - Browser support (snippet)
 - Complete and Anywhere users (snippet)
 - Pre-installation and Requirements (landing page for snippets)
 - Available virtual machine (subscription instance) sizes (snippet)
 - Firewall rules for application instances (snippet)
 - Python for Linux users (snippet)
 - Remove anti-virus software (snippet)
 - Service availability (snippet)
 - Service installation (snippet)
 - Service remediation (snippet)
 - Installation screen (landing page for snippets)
 - Account administrator permissions (snippet)
 - Download and install the Armor Agent Windows (snippet)
 - Download the Armor Agent Amazon Linux, CentOS, Redhat (snippets)
 - Download the Armor Agent Ubuntu (snippet)
 - Elastic Beanstalk Amazon Linux Agent (snippet)
 - Elastic Beanstalk Windows Agent (snippet)
 - High-level installation for Anywhere (snippet)
 - Install agent for Windows 2008 (snippet)
 - Install agent for Windows 2012 and 2016 (snippet)
 - install agent overview (snippet)
 - Install the agent (Linux) (snippet)
 - Install the Armor Agent Amazon Linux, CentOS, and Redhat (snippets)
 - Install the Armor Agent Ubuntu (snippet)
 - Locate the Armor Agent (snippets)
 - Subscribe to data center notifications (snippet)
 - Security Dashboard snippets landing page
 - Detection dashboard (snippet)
 - Export Protection screen (snippet)
 - Health Overview Dashboard (snippet)
 - Protection dashboard (snippet)
 - Response dashboard (snippet)
 - Troubleshoot FIM score (snippet)
 - Troubleshoot logging score (snippet)
 - Troubleshoot Malware Protection scores (snippet)
 - Security screen (landing page for snippets)
 - Access the Dynamic Threat Blocking screen (snippet)
 - Add a rule (snippet)
 - Anywhere Host Note (snippet)
 - Create a firewall rule (snippet)
 - Create a firewall rule with a new IP address group (snippets)
 - Create a new virtual machine with a new workload (snippet)
 - Create an IP group (snippet)
 - Create a service group (snippet)
 - Delete a rule (snippet)
 - Delete or edit a rule or group (snippet)
 - Dynamic Threat Blocking Overview (snippet)
 - Firewall rules (snippet)
 - Operating System Support for Anywhere (snippet)
 - Operating System Support for Complete (snippet)
 - Patching (snippets)
 - Perform an IP lookup (snippet)
 - Remote log collector snippets
 - Add a remote log collector in a RedHat system (snippet)
 - Create an endpoint (snippet)
 - Create a remote log source for an AWS environment (snippet)
 - Create a remote log source for a non-AWS environment (snippet)
 - Create a remote log source to collect Windows logs (snippet)
 - Permissions for Log Relay and Remote Log Collection (snippet)
 - Review compatible log source types (snippet)
 - View existing endpoints (snippet)

- View existing remote log sources (snippet)
 - Resource Requirements (snippets)
 - Security Incidents Widget (snippet)
 - Test your connection (snippet)
 - Troubleshoot FIM (snippet)
 - Troubleshoot Malware Protection data (snippet)
 - Understand FIM status (snippet)
 - Understand Malware Protection Data (snippet)
 - Update Armor Agent configuration file (snippet)
 - View FIM data (snippet)
 - View malware events (snippet)
 - View Malware Protection data (snippet)
 - Virtual machines offerings (snippets)
- Infrastructure screen (landing page for snippets)
 - Cancel product subscription (snippet)
 - Change Data View (snippet)
 - Delete a virtual machine (snippet)
 - Delete a workload (snippet)
 - Disaster Recovery introduction (snippet)
 - Enable and install your SSL/VPN access (snippet)
 - Enable SSL/VPN for your user (snippet)
 - Export virtual machine and workload data (snippet)
 - Order Disaster Recovery from the Marketplace (snippet)
 - Order Disaster Recovery from Virtual Machines screen
 - Remove SSL VPN access for your users
 - Request a live failover (snippet)
 - Request a test failover (snippet)
 - Review the server status (snippet)
 - Troubleshoot Disaster Recovery (snippet)
 - Troubleshoot SSL VPN client (snippet)
 - View and delete offline virtual machines (snippet)
 - Workloads and tiers (snippet)
- Marketplace (landing page for snippets)
 - Configure Marketplace Products (snippet)
 - Configure VM add-on products (snippet)
 - Marketplace Overview (snippet)
- User Guides (landing page snippets)
 - Access the Security Incidents screen (snippet)
 - Add AWS account via Cloud Connections (snippet)
 - Configure additional log management features (snippet)
 - Export Patching data (snippet)
 - FIM (snippets landing page)
 - Export File Integrity Monitoring (FIM) data (snippet)
 - View FIM detail (snippet)
 - Log Depot (landing page for snippets)
 - Log Depot Overview (snippet)
 - Log Management (snippets landing page)
 - Export log service status (snippet)
 - Log Management Overview (snippet)
 - Log Sources (snippet)
 - Troubleshoot Log Management screen (snippet)
 - View collected logs (snippet)
 - View logging subagent status
 - Malware (snippets landing page)
 - Export Malware Protection data (snippet)
 - Malware Protection screen (snippet)
 - Run a Malware scan (snippet)
 - Troubleshoot Malware Protection screen (snippet)
 - View Malware Protection details (snippet)
 - View Malware scan activity (snippet)
 - Request a new source / connector
 - Review available log retention plans (snippet)
 - Security Incidents - Overview (snippet)
 - Troubleshoot the Security Incidents screen (snippet)
 - Upgrade default log retention for new virtual machines (snippet)
 - Upgrade log retention for existing virtual machines (snippet)
 - View log collection projections (snippet)
 - View Patching data (snippet)
 - View Patching details (snippet)
- Support screen (landing page for snippets)
 - Additional ways to contact Armor (snippet)
 - Call Armor (snippet)
 - Chat with Armor (snippet)
 - Create a support ticket (snippet)
- Account screen (landing page for snippets)
 - Account administrators only (snippet)
 - Assign a role to an existing user account (snippet)
 - Complete your account signup (snippet)
 - Configure notification preferences (snippet)

- [Create a role and add permissions \(snippet\)](#)
 - [Delete a role \(snippet\)](#)
 - [Invite a new user \(snippet\)](#)
 - [Remove a role for a newly created or existing user \(snippet\)](#)
