

# Get Cloud Connections

This topic only applies to **Armor Anywhere** users.

The **Get Cloud Connections** API returns detailed information about a specified cloud connection.

You can use [POST Cloud Connections API](#) to find the `connectionId` (`id`).

## Sample Request

```
GET https://api.armor.com/cloud-connections/2
```

## Input

The following table describes the different parts of this API call:

API Call / URL	Method / Type
/cloud-connections/{connectionId}	GET

The following table describes the parameter (or parameters) for this API call:

Parameter	Description	Format	Required or optional	Example
<code>connectionId</code>	The ID of the cloud connection	Integer	Required	2

## Sample Return

Status	Response
200	<pre>{   "connectionName": "AWS(Development)",   "description": "For Search",   "providerAccountId": "345186984524",   "armorAwsAccountId": "679703615338",   "externalId": "b364a1a3-19fe-4c74-80ec-848f4ee125df",   "providerAccessResource": "arn:aws:iam::d345186984524:role/armor_audit",   "providerTypeName": "AWS",   "accountConnectionId": 1,   "serviceTypeName": "CloudTrail Log Ingestion",   "accountId": 2 }</pre>
400	Bad Request
