

Armor Anywhere

Armor Knowledge Base

Security

Dashboards

Use the security dashboards to review and troubleshoot data for your virtual machine

- [ANYWHERE Health Overview Dashboard](#)
- [ANYWHERE Protection Dashboard](#)
 - [Improve your Protection score](#)
- [ANYWHERE Detection Dashboard](#)
- [ANYWHERE Response Dashboard](#)
- [ANYWHERE Manage your Health Scores](#)

Malware Protection

Learn how malware data affects the security status of your instance

- [View malware events](#)
- [View service health data for Malware Protection](#)
- [Understand service health data for Malware Protection](#)
- [View detailed Malware Protection data](#)
- [Run a Malware scan](#)
- [View Malware scan activity](#)
- [Troubleshoot Malware Protection data](#)
- [Export Malware Protection data](#)
- [Troubleshoot Malware Protection screen](#)

Vulnerability Scan Details

View a parsed version of the weekly vulnerability scanning report

- [Access and view detailed report information](#)
- [Troubleshoot a vulnerability](#)

Infrastructure

Virtual Machines

Install the Anywhere agent or review your deployed virtual machines

- [Review the Virtual Machines screen](#)
- [Export usage data](#)
- [Install the Anywhere Agent](#)
 - [Windows 2008](#)
 - [Windows 2012 and 2016](#)
 - [Linux](#)

Dynamic Threat Blocking

Research the reputation of specific IP addresses in order to allow or block

- [Access the Dynamic Threat Blocking screen](#)
- [Add a rule](#)
- [Delete a rule](#)
- [Perform an IP Lookup](#)
- [Troubleshooting Dynamic Threat Blocking screen](#)

File Integrity Monitoring (FIM)

Learn how FIM data affects the security status of your instance

- [View FIM data](#)
- [Understand FIM data](#)
- [View detailed FIM data](#)
- [Export FIM data](#)
- [Troubleshoot FIM data](#)

Security Incidents

Review critical support tickets, known as Security Incidents

- [Access the Incidents screen](#)
- [Troubleshoot the Incidents screen](#)

Account

Cloud Connections

Sync your public cloud account into AMP, such as your Amazon Web Services (AWS) account

- [Add an AWS public cloud account](#)
- [View your added \(connected\) public cloud instances](#)
- [Troubleshooting Cloud Connections screen](#)
- [Create a Cloud Connection for AWS Security Hub](#)

CIS Benchmarks

Review the CIS Benchmarks™ that have been adopted by Armor

- [CIS Benchmarks](#)
