

# Create Additional Log Sources

## Armor Knowledge Base

You can add a remote log collector to the following remote devices (log sources):

- [Create a Remote Log Source - Apache HTTP Server For CentOS 6](#)
- [Create a Remote Log Source - Apache HTTP Server for Ubuntu 14](#)
- [Create a Remote Log Source - Wincollect](#)

## Related Documentation

- To learn how to collect and send additional log types to AMP, see [Introduction to Log Relay](#).
- For a detailed guide on how to obtain Log Relay, see [Obtain Log Relay for Remote Log Collection](#).
