Topics Discussed

Virtual Machines, Marketplace, New Rolls/API Calls, Anywhere Host (Anywhere Agent), Invoice Details

Virtual Machines [UPDATE](#)

In the Armor Management Portal (AMP), the **Virtual Machines** screen has been updated with new functionality.

You can now use this screen to create and configure the following virtual appliances / **Marketplace** add-on products:

- Load Balancer
- Backup & Recovery Server
- Persistent Data Encryption Manager
- Advanced WAF

The screenshot shows the Armor Management Portal (AMP) interface. The left sidebar contains navigation menus for SECURITY, MARKETPLACE, INFRASTRUCTURE, COMPUTE, and NETWORK. The 'Virtual Machines' option under COMPUTE is selected. The main content area displays a table of virtual machines with columns for NAME, LOCATION, TIERS, VMS, CPUS, MEMORY, and STORAGE. A 'Create New' dropdown menu is highlighted, listing options: Virtual Machine, CORE Defense, Load Balancer, Backup & Recovery Server, Persistent Data Encryption Manager, and Advanced WAF.

NAME	LOCATION	TIERS	VMS	CPUS	MEMORY	STORAGE
		2	1	1	2.0 GB	16.0 GB
		2	1	1	2.0 GB	30.0 GB
		1	1	1	2.0 GB	30.0 GB
		2	2	3	18.0 GB	46.0 GB
		1	1	2	4.0 GB	30.0 GB

Additionally, the **Virtual Machines** screen now contains a column entry named **Type**. This entry displays the type of Armor product listed in the table.

NAME	SECURITY	TYPE	PROVIDER	OS	POWER
	0	Advanced WAF	Armor	Brocade vTM 10.4	ON
	0	Load Balancer	Armor	Brocade vTM 10.4	ON
	1	Virtual Machine	Armor	CentOS 6.7	ON
	0	Virtual Machine	Armor	CentOS 7.1	OFF
	3	Virtual Machine	Armor	Ubuntu 14.04	OFF
	0	Virtual Machine	Armor	CentOS 7.1	OFF

Marketplace UPDATE

In the Armor Management Portal, the **Marketplace** has been updated with new add-on products.

Now, the **Marketplace** contains the following virtual appliances:

- Backup and Recovery Agent
- Persistent Data Encryption Agent
- Load Balancer
- Backup and Recovery Server
- Persistent Data Encryption Manager
- Advanced WAF

For a complete list of available add-on products, see [View available add-on products](#).

New Roles / API calls NEW

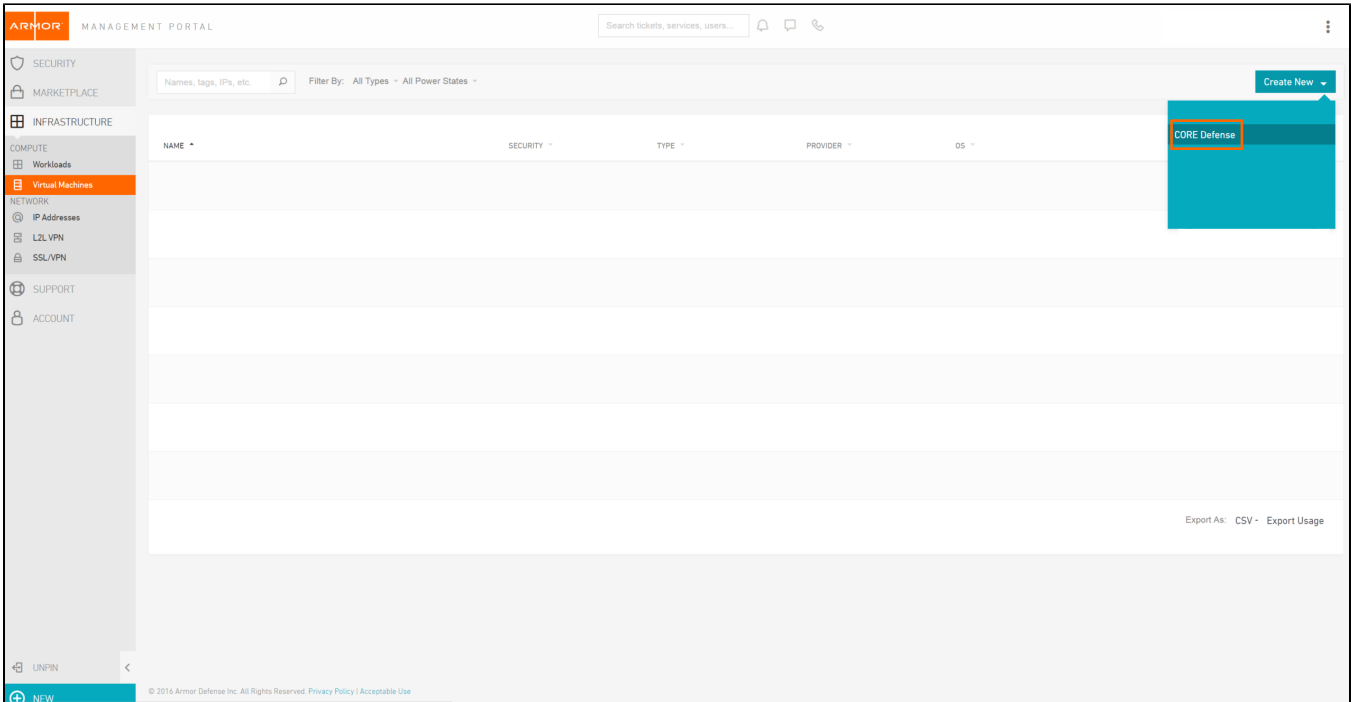

In the Armor Management Portal (AMP), new permissions are now available to add to your roles.

These new permissions mostly offer functionality for the **Marketplace** screen and **Virtual Machines** screen.

For a complete list of permissions, see [Review available permissions](#).

Anywhere Host (Armor Agent) UPDATE

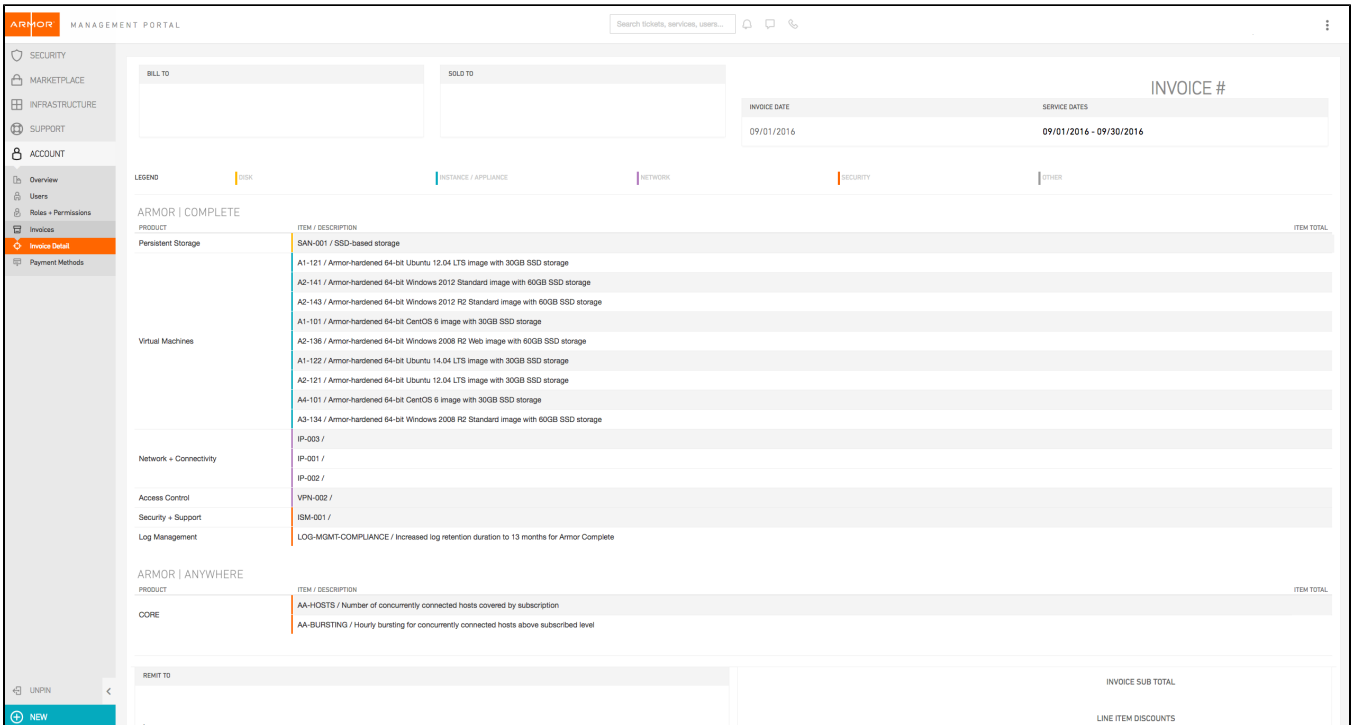

In the Armor Management Portal (AMP), the label **Anywhere Host** is now called **CORE Defense**. Informally, **CORE Defense** is also known as the **Armor Agent**.

Invoice Details

NEW

In the Armor Management Portal (AMP), you can now access the **Invoices Details** screen to view a summary of a specific invoice.

Additionally, you can export and download a specific invoice.

For more information, see [Invoices and Payments](#).
