

Armor Partners

Armor's partner program is designed to enable partners to drive new business opportunities. For more information on our partner program, visit the [Partner Portal](#).

This guide applies to partners that support **Armor Complete** and / or **Armor Anywhere**.

Armor Anywhere Agent 3.0

Armor Anywhere Agent 3.0 delivers flexibility in managing Armor services on a Virtual Machine through both Command Line Interface and the Armor Toolbox, available within the Armor Management Portal (AMP). To learn more about Agent 3.0, see [Armor Anywhere Agent 3.0](#).

Managing Accounts

To set up New Users in the Armor Management Portal, read these step-by-step [articles](#).

Within the Armor Management Portal (AMP), partners have the ability to manage their customer "child" accounts. To learn more about this feature, see [Sub-Accounts](#).

Webhook Configuration and Usage

Security incidents, detections, and events are supported by the Armor webhook platform. Armor's webhook documentation is available [here](#).
