## Armor Knowledge Base

### Topics Discussed

- [Anywhere Agent](#)
- [Dynamic Threat Blocking](#)
- [Log Management Services](#)

### Anywhere Agent

---

Based on your operating system, select the appropriate document to learn how to install the Anywhere Agent:

- [Windows 2012 and 2016](#)
- [Linux](#)

### Dynamic Threat Blocking

---

At a high-level, you can use **Dynamic Threat Blocking** to:

- Perform an IP lookup to research the safety of an IP address.
- Create a rule to allow (whitelist) or block (blacklist) an IP address.
  - Although you can use this screen to research, create, and organize rules, you are responsible for implementing the actual rules in your environment.
- Review users who have performed an IP lookup in your account.

To learn more, see [ANYWHERE IP Threat Lookup](#).

### Log Management Services

---

To enhance the default Log and Data Management services, you can:

- Upgrade the log retention rate for these default log types from 30 days to 13 months.
  - To learn more, see [Review log retention plans](#).
