AMP 2.95.3

Hangfire job for PROD due to iRAX account creation issues: change will retry the account creation via automated job to "fix" broken accounts.

AMP 2.95.0

For certain customers, an issue was corrected with how their account discount was displayed within the AMP Marketplace purchase confirmation pages.

Zuora invoicing was already working correctly and not changed by this work.

Details on additional Armor Ticketing System (ATS) API endpoints are now available in Armor's developer documentation at developer.armor.com.

Microservices

Agent Technology:

- Created Toolbox Task to initiate Malware scans even if Trend DSM unavailable.
- Enhanced Trend Uninstall to remove folder after Uninstall on Windows & Linux. Resolved error of re-doing Trend Install and being failed because previous Trend folder not deleted.
