

Create an API (snippet)

When you create an API Key, you will generate a **Secret Key**. This key does not expire; you must securely store this key because Armor cannot retrieve this key for you.

If you lose the **Secret Key**, then you must delete the corresponding API Key in AMP. Afterwards, you must create a new API Key.

Armor cannot retrieve your **Secret Key**.

1. In the Armor Management Portal (AMP), in the left-side navigation, click **Account**.
2. Click **Users**.
3. Click **API Keys**.
4. Click the plus icon.
5. Enter a descriptive name, and then click **Create Key**.
6. Copy the **Key ID** and **Secret Key**.
7. Click **Close**.
8. The **API Keys** table will display a new entry.
