Vulnerability Scanning

UPDATE

In the Armor Management Portal (AMP), on the **Vulnerability Scanning** screen, there were a number of enhancements made, to include newly added and renamed columns.

The following updates were made to make the information on the screen easier to view and understand:

- Updated the description at the top of the screen
- Renamed the following columns:
 - Changed **Scan Name** to **Report Name**
 - Changed **Scan Start Time** to **Import Time**
 - Changed **Scan End Time** to **Import Status**
- Replaced the **Status** column with the **Vulnerabilities** column
 - The **Vulnerabilities** column displays the number of vulnerabilities within the report, grouped by severity
- Added the ability to export vulnerability scans to a CSV file

REPORT NAME	IMPORT TIME	IMPORT STATUS	VULNERABILITIES				
Report 10/16/2019	Today, 11:10 AM	Completed	392	354	273	131	1
Report 10/13/2019	10/13/2019 5:08 PM	Completed	395	360	272	132	1
