Vulnerability Scanning

UPDATE

This topic only applies to **Armor Complete** users.

Armor Complete users will now utilize a vulnerability scanning service provided by Rapid7. To learn more about the recent vulnerability scanning updates, review the [FAQs](#).

In the Armor Management Portal (AMP), on the **Vulnerability Scanning** screen, a new scanning report will display every week. You can review details of this report to learn which vulnerabilities have been detected in your environment. With this information, you can then perform your own patching and other troubleshooting activities.

SCAN NAME	SCAN START TIME	SCAN END TIME	STATUS
Scan 09/01/2019	09/01/2019 9:11 PM	09/01/2019 9:11 PM	Completed
Scan 08/25/2019	08/25/2019 5:32 PM	08/25/2019 5:32 PM	Completed
Scan 08/22/2019	08/22/2019 6:52 PM	08/22/2019 6:52 PM	Completed
Scan 08/21/2019	08/21/2019 10:42 AM	08/21/2019 10:42 AM	Completed
Scan 08/18/2019	08/18/2019 5:40 PM	08/18/2019 5:40 PM	Completed
Scan 08/11/2019	08/11/2019 5:29 PM	08/11/2019 5:29 PM	Completed
Scan 08/09/2019	08/09/2019 3:03 PM	08/09/2019 3:03 PM	Completed
Scan 08/04/2019	08/04/2019 5:21 PM	08/04/2019 5:21 PM	Completed
Scan 07/28/2019	07/28/2019 5:36 PM	07/28/2019 5:36 PM	Completed
Scan 07/21/2019	07/21/2019 5:34 PM	07/21/2019 5:34 PM	Completed
Scan 07/14/2019	07/14/2019 5:18 PM	07/14/2019 5:18 PM	Completed

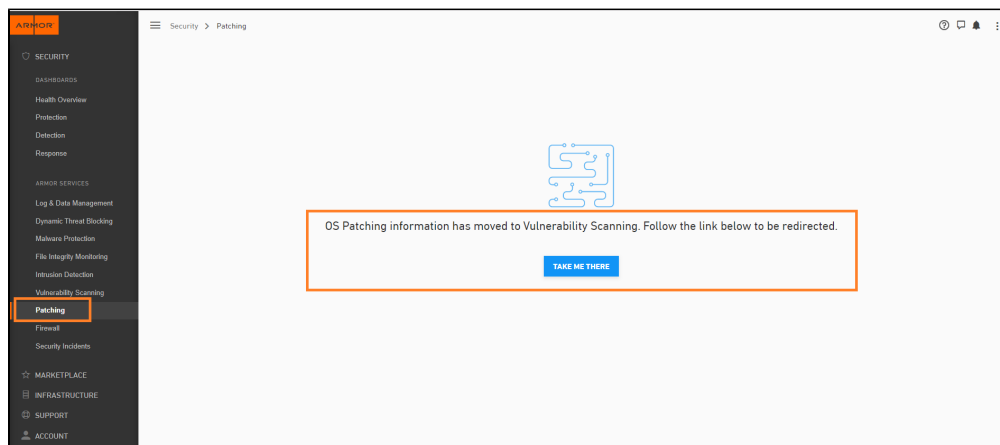

To learn about this screen, see [Vulnerability Scanning \(Armor Complete\)](#).

Patching

DEPRECATED

To accommodate Rapid7's integration for vulnerability scanning with Armor Complete, the **Patching** screen in the Armor Management Portal (AMP) has been deprecated for Complete and Anywhere users.

While the screen will still appear in the left-side navigation in AMP, upon clicking on **Patching**, you will be directed to the **Vulnerability Scanning** screen.

Firewall

UPDATE

This topic only applies to **Armor Complete** users.

To allow faster navigation through the **Firewall** screens in the Armor Management Portal (AMP), the following enhancements have been made:

- Updated the API calls to allow firewall rules to load much faster.
- Added the ability to adjust the number of rows displayed on the page, as well as the ability to go to a specific page.
- On the Firewall **Rules** tab, the **Rule** field now displays the complete value of the rule number.

To learn more about this screen, see [Firewall Rules](#).

AMP Update

UPDATE

In the Armor Management Portal (AMP), you can now quickly access documentation related to the particular product or screen that you are viewing by clicking the new **Help** icon in the top, right corner of the screen.

TICKET #	SUMMARY	SEVERITY	TICKET STATUS	CREATED DATE
ATS-32929	You do not have permission to view this ticket	Low	Pending Customer	09/02/19
ATS-32765	You do not have permission to view this ticket	Low	Pending Customer	09/01/19
ATS-32009	You do not have permission to view this ticket	Low	Pending Customer	08/29/19
ATS-31776	You do not have permission to view this ticket	Low	Pending Customer	08/28/19
ATS-31539	You do not have permission to view this ticket	Low	Pending Customer	08/27/19

Upon clicking the icon, the applicable Armor knowledge base article will open in a new window. If there is no article available, the homepage for the Armor knowledge base will display.

Activity

UPDATE

In the Armor Management Portal (AMP), the **Activity** screen has been updated. The following changes will now be tracked and displayed on this screen:

- SKU displays when a new product is purchased in the Marketplace.
- Changes to the Primary Billing User now display.

Account Activity

View account activity and upcoming scheduled events.

User, Type, Activity
