

Armor Anywhere Agent 3.0

[Armor Knowledge Base](#)

Getting Started

With the Armor Anywhere Agent 3.0, users now have options for how they install the Agent and additional Security Services and scheduling tasks using the Toolbox in the Armor Management Portal. The Armor Toolbox delivers flexibility in self-managing Armor services running on a VM. The documentation provided in this section will guide you through the pre-install and install process as well as using the new Toolbox and its features. For more documentation on getting started Armor Anywhere Agent 3.0, please explore the links below.
